

Factories that export without polluting.

Net-zero industrial parks built around a living core, and the same living systems fitted to the estates already running.

9,200

direct jobs in one park, by design

96%

of the park's water recycled

22,400 t

of carbon credits a year, by design

New parks, and the ones already running.

नए और पुराने

GREENFIELD · FACTORY TO FUTURE

A net-zero park where a tenant arrives, plugs in and begins.

Site	110 acres, ten plots of six acres in a ring 752 metres across
Living core	two 40-metre photobioreactor towers and a command centre
Water	1,200 KLD zero-liquid-discharge plant; 96% recycled
Power	18 MWp of solar with 6 MWh of storage
Carbon	22,400 tonnes of credits a year, by design
Build	42 months to full commissioning; first shipment in month 22

BROWNFIELD · EXISTING ESTATES

The living core, fitted to a factory that is already working.

-  **Living units** at the gate, the canteen and the loading bays, with screens for safety notices and alerts, and optional AI cameras for crowd flow at shift change.
-  **A living stage** on the effluent line after treatment, taking up what the plant leaves behind.
-  **A carbon record** measured at the unit, kept alongside your export and sustainability filings.
-  **One digital twin** for air, water and carbon across the estate, read in real time.
-  **The harvest leaves** as natural fertiliser and biomass, not as waste.

WHAT IT TAKES OUT OF THE AIR · TESTED

fall after 12 hours, sealed chamber

Fall in a sealed test chamber after 12 hours, measured by an NABL-accredited laboratory, report MS-200626-03, 2 July 2026. Results at a site depend on its size, ventilation and conditions.

WHY NOW

Buyers in Europe now price the carbon in what they import.

Europe's carbon border charge has applied in full since January 2026, and 490 Indian entities carry carbon-intensity targets.

18 MWp

of solar in one park

1,200

KLD of water treated a day

42

months to full commissioning

Park figures are design figures from the group's brief for Uttar Pradesh; a tower at pilot scale is built before a park is financed.

WHAT WE WORK ON · स्वच्छ वायु, निर्मल जल, उर्वर मृदा

Air वायु

Living columns take carbon dioxide and dust out of the air where crowds gather.

Water जल

Lakes, ponds and drains restored by their own ecology, never dredged.

Soil मृदा

The harvest returns carbon to tired soil as natural fertiliser.
